GOOD IDEAS. BETTER SYSTEMS.

Practical technology.
Better everyday work.

JARS builds websites, library platforms and workflow software that help organisations spend less time on busywork and more time on what matters.

Based in Ondo, Nigeria. Open to remote collaboration.

WHAT WE CAN HELP YOU BUILD

01 / WEBSITES & WEB APPLICATIONS

A credible online presence and tailored web tools that help visitors understand your offer and take the next step.

02 / LIBRARY & RESOURCE PLATFORMS

Searchable knowledge resources, academic-service journeys and better-connected library workflows.

03 / WORKFLOW & MANAGEMENT PORTALS

Records, attendance, requests and approvals shaped around the way your organisation works.

04 / REPORTING & IMPLEMENTATION

Useful dashboards, PDF/Excel reporting, careful implementation and agreed training or support.

Business name registration No. 10025138 · Ondo, Nigeria

SELECTED WORK. REAL POSSIBILITIES.

See the thinking.
Imagine the possibilities.

UNIMED LIBRARY WEBSITE & AUTOMATION

Ongoing development connecting digital-resource discovery, academic-service workflows, circulation and personal updates. A university-library project focused on the people using and managing information.

SUNDAY SCHOOL WORKFORCE PORTAL

A local-first management project covering people and class records, individual attendance, weekly submissions, role-based approvals and PDF/Excel reporting.

Portfolio descriptions show selected work and documented capabilities. Walkthroughs use sample information rather than access to private client records.

A CLEAR PATH FROM IDEA TO EVERYDAY USE

Listen & understand → Shape the plan → Build & refine → Handover & support

Every project is scoped around your requirements. Deliverables, deployment, training, maintenance and ongoing support are agreed before the work begins.

YOUR NEXT GOOD IDEA STARTS WITH A HELLO.
